

Advanced SQL To PDF Table Converter

Product Information Page:

http://www.advancedreliablesoftware.com/advanced_sql_to_pdf_table_converter.html

Advanced SQL To PDF Table Converter is a relational database client utility that allows execution of SQL (Structured Query Language) statements on Microsoft SQL Server, MySQL and Oracle databases. Resultsets returned by select queries are automatically persisted as PDF table files to a directory of your choice.

Prerequisites (Optional) – Download MySQL Driver

The application connects to MySQL database servers via MySQL Connector ODBC 3.51 driver. This driver can be downloaded from

<http://www.advancedreliablesoftware.com/downloads.html>

This driver must be installed on the target machine in order to execute SQL statements on MySQL databases, but is not required for Microsoft SQL Server functionality.

Step 1 – Database Type

Select database type: Microsoft SQL Server, MySQL or Oracle.

Step 1 - Database Type

Microsoft SQL Server MySQL Oracle

Step 2 – Database Connection Settings

Provide database connection details:

Step 2 - Database Connection Settings

Microsoft SQL Server Authentication Windows Authentication

Database Server: Login:

Database Name: Password:

Step 2 - Database Connection Settings

Microsoft SQL Server Authentication Windows Authentication

Database Server: Login:

Database Name: Password:

Step 3 – SQL Select Query

Enter valid SQL select query.

Step 3 - SQL Select Query

```
select LastName, FirstName, Title from Employee
```

Step 4 (Optional) – Column Headers

Check the “Insert Column Headers” check box to include table column headers in your output PDF document. Define one header for each column in your SQL query. To add new column header enter desired information in the input field and click the “Add Column Header” button. To remove specific column header select it in the grid and click the “Remove Column Header” button.

Step 4 (Optional) - Column Headers

Insert Column Headers

Column Headers	
Last Name	
First Name	
Title	

Add Column Header

Remove Column Header

Sample PDF output file table column headers:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative

Step 5 – Output PDF File Properties

Define properties of the output PDF document: page size, page orientation, font, font size.

Step 5 - Output PDF File Properties

PDF Page Size: Letter
PDF Page Orientation: Portrait Landscape
PDF Font: Arial PDF Font Size: 12

Step 6 – Output Directory

Click the “...” button to assign output directory path. The application will automatically persist your most recently used output directory path for future reference.

Step 6 - Output Directory

C:\Documents and Settings\Administrator\My Documents

Step 7 (Optional) – Output PDF File Name

Assign custom name for your PDF output file.

Step 7 (Optional) - Output PDF File Name

Output PDF File Name:

Step 8 – Execute SQL Query / Generate PDF Output

Click the “Execute SQL Query / Generate PDF Output” button to execute SQL query and generate an output PDF document. Your PDF output document will be created in the directory defined in Step 6.

Step 8 - Execute SQL Query / Generate PDF Output

Sample PDF output:

Last Name	First Name	Title
Davolio	Nancy	Sales Representative
Fuller	Andrew	Vice President, Sales
Leverling	Janet	Sales Representative
